REMV is an interdisciplinary, international peer-reviewed, and open-access journal concerned with new theoretical and practical insights that improve our understanding of real estate sciences. REMV publishes high-quality original papers on theoretical and practical aspects of real estate economics, finance, investment, valuation, and management. The interdisciplinary nature of our journal results from drawing from a wide variety of disciplines, including economics, geography, land use, planning, law, sociology, surveying, and construction.

We officially inaugurated also the launch of the channel informing about the REMV publishing house on the TWITTER platform:
